

Employee Workers Compensation Notice

In the event of a work related injury, you must notify StatGroup's Human Resources (HR) Department in writing within 30 days. You are also responsible for reporting the incident to your immediate supervisor and getting immediate medical attention, following the facility's protocol. You need to fax a physician-signed incident report to HR. If you receive any invoices or billing statements for this work-related injury, please forward them to HR as well. Please call StatGroup HR if you have any questions or problems with a worker compensation issue.

I have read and understand the procedure for filing a worker compensation claim.
